 - Team Patch attached at N/C. Provide with order.
 - Made in the USA.
 - Sizes: Standard, Shorts, Talls, Semi-custom, and full custom.
 - All Options available
- **Materials:** Tough, military specification high tenacity, 210 denier High Count nylon, 210HC™. High Count nylon contains more threads woven into each square inch of fabric. The resulting fabric has a very tightly packed weave for extraordinary abrasion and puncture resistance, yet still light in weight.
- **Waterproof Coating:** The 210HC™ nylon is triple coated with six ounces of polyurethane on the inside to protect it from the scratches and punctures that occur on the outside of the fabric. A high molecular density polyurethane laminate provides total waterproofing and internal abrasion resistance.
- **Testing:** Each drysuit is individually tested under pressure and under water.
- **Warranty:** Two year limited warranty. See Warranty Page.
