- Made in the USA.
- Sizes: XS-XXL, and CUSTOM.
- Options available: DV-Boots, Relief Zipper, Suspenders.

• **Materials:** Tough, military specification high tenacity, 210 denier High Count nylon, 210HC™. High Count nylon contains more threads woven into each square inch of fabric. The resulting fabric has a very tightly packed weave for extraordinary abrasion and puncture resistance, yet still light in weight.

• **Waterproof Coating:** The 210HC™ nylon is triple coated with six ounces of polyurethane on the inside to protect it from the scratches and punctures that occur on the outside of the fabric. Two solution coats of polyurethane are impregnated deep into the fibers of the nylon. A high molecular density layer of polyurethane is then laminated to these solution coats, for total waterproofing and for internal abrasion resistance.

• **Testing:** Each drysuit is individually tested under pressure and under water.

• **Warranty:** One year limited warranty. See Warranty Page.
