MANTA (FRONT ENTRY) TROPICS DIVING DRYSUIT

The **MANTA FE** Tropics Drysuit, DMNT(FE)-3, is designed for the travel or tropics diver, not too heavy, not too bulky, easy to carry and use. The **MANTA FE** shell, size Medium, including valves and hose, weighs only 4.0 pounds.

The **MANTA FE** is made from the same high tenacity 210 denier High Count Nylon shell fabric as other OS SYSTEMS heavy duty drysuits, the **HDPRO**, the **SARR**, the **NAUTILUS**, and the **DOLPHIN**. However, the polyurethane coatings on the **MANTA FE** fabrics are lighter. This 210 HCLT (High Count Lightweight) fabric is extremely strong and durable, yet extraordinarily soft, comfortable and light weight.

The **MANTA FE** features include:

- Horizontal Front entry, #8 brass tooth diving zipper
- Cordura Zipper Cover
- Suspenders
- Crotch gusset/built in underarm gusset
- Mauser stitching with double taping
- A split bungie cord waist
- Cordura Dome Knee Pads/Ankle Wraps
- Ankle seals are standard. Latex socks are a n/c option, with original factory order
- Standard sized wet suit boots are compatible
- Designed for use with thinner undergarments
- Every **MANTA FE** is tested underwater and under pressure

The **MANTA FE** drysuit includes:

- SI TECH valves (Pro Swivel Inlet/Low Profile Automatic Exhaust)
- 32" Low Pressure Hose
- Zipease lubricating stick
