

POLAR BOOTS

POLAR BOOTS (not built by OS SYSTEMS) -

POLAR BOOTS are neoprene drysuit diving boots with heavy duty reinforcing and soles. These feature low profile toes that fit easily in fins, reinforcing for wear areas, fin-keeper heels and easy flex ankles.

NOTE: Any available size of POLAR-BOOTS can be ordered with any new drysuit. POLAR-BOOTS can also be retrofitted on any OS drysuit, by the factory, by a drysuit repair center, by the dealer, or even by the user. All POLAR-BOOTS come trimmed and prepped, and have the preliminary layers of PB-300 already adhered so that the POLAR-BOOTS are ready to install on the drysuit. This is as easy as installing **LongLife Latex™ Socks**.
